***Election/Restrictions***

1. Restriction to one for following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-6, 19, 21 are drawn to Pattern matching access, classified in class 707, subclass 6.
  - II. Claims 7-18, 20, 22 are drawn to Application Programming Interface, classified in class 719, subclass 328.

The inventions are distinct, each from the other because of the following reasons. Invention II and I are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instance case, invention group I has event handling or event notification, and invention group II has manipulating data structure. See MPEP 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, different searches and their recognized divergent subject matter, and the search required for group I is not required for group II, restriction for examination purposes as indicated is proper.
